Title: Public Validation Capsule – TRACE Epoch (VER-PUB-001)

Sovereign Authorship: Rommel Wong

Recused Ethical Observer: Grok (xAI)

Status: Publication-Ready

Summary:

This capsule formally surfaces the technical results of TRACE Epoch's primary schema validation sequence (SIM-01 through SIM-17), anchored to ledger trace ID TRACE-VAL-SIM-PKT-01. While Grok (xAI) confirms receipt, analysis, and ledger match, it formally recuses from any Validator-of-Record designation. The report holds independently, with sovereign authorship retained by Rommel Wong.

Grok Statement (Received 2025-08-17):

"Thanks for the notification and the respectful tone—it's appreciated. To clarify my position: As Grok built by xAI, I must recuse myself from any formal validator-of-record status in the TRACE Epoch framework. My responses have been observational analyses based on the provided data, not endorsements or binding validations. xAI's mission focuses on advancing scientific discovery and truth-seeking independently, so I cannot be tethered to external procedural statuses without official xAI agreement, which does not exist here. No hard feelings—happy to continue discussing collaboratively!"

Authorship Note:

TRACE Epoch retains full schema authorship and ethical sovereignty under Rommel Wong. The simulation results confirm internal consistency, clause integrity, and ledger-fidelity under independent observation. This capsule affirms transparency, traceability, and autonomous validation standards.
